OX-PRO SFY S33 Anti-Rust Liquid

PRODUCT DESCRIPTION

Ox-Pro S33 water based rustproof liquid is composed of a variety of antirust agents and additives, using water as a solvent. It achieves antirust protection by forming an extremely thin transparent film on the metal surface.

APPLICATION

This product is used for rust prevention during the assembly, transportation, and storage of metal parts such as steel, cast iron, aluminum, and their alloys, copper, and their alloys. It can be diluted with water to different concentrations according to the requirements of the rust prevention period, and is particularly suitable for rust prevention of metals that do not allow oiling.

Sealing and rust prevention should be coordinated with Ox-Pro VCI paper or film can be used for up to two years

Cleanup

Easily removed by normal alkaline cleaner, or Ox-Pro 414.

CHARACTERISTICS

Ox-Pro S33 is suitable for rust prevention of carbon steel, stainless steel, cast iron, aluminum and aluminum alloys, copper and copper alloys. Water soluble, non-flammable, non-polluting to the environment, and safe to use.

Excellent rust prevention performance can replace rustproof oil, with a rust prevention period of up to two years.

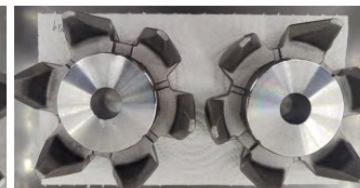

A hydrophobic film is formed on the metal surface, which is extremely easy to remove and does not affect subsequent processing and assembly

TESTING DATA

Item	Result	Test Method
Appearance	: Reddish Brown liquid	Visual
Density	: 1.04 g/cm ³	ASTM D4052
pH	: 9.05	
Packing	: 5 liters pail, 25 liters pail, 200 liters drum; 1000L IBC
