

The right products — the right results

Is your maintenance schedule doing all right? We present to you fit-for-purpose products and solutions?

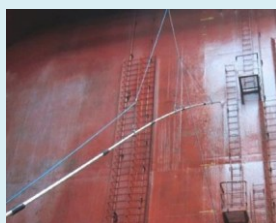

Remove stubborn stains easily

For the toughest and most stubborn stains that have accumulated over time, the right chemical to use is Ox-Pro™-426.

Protect Assets conveniently

Spray, brush or dip, Idealfluids work with you to provide easy to use methods for fast and convenient oxidation protection of your equipment.

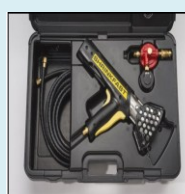

Featured Products:

Cleaning and Degreasing
using Ox-Pro™ 414

Fogging of Ox-Pro™ 137
into void spaces for asset
corrosion protection

Providing service, tools, products and equipment to complete a
equipment preservation

Why is cleaning and preservation of equipment so important?

By using fit-for-purpose cleaning chemical and equipment, you can pull the best performance out of the chemicals and reduce overall chemical consumption.

The Cleaning Diagram on the right shows the four variable factors of a cleaning process: time, temperature, equipment, chemicals.

Although Ox-Pro™ cleaning products prevent flash rust, after cleaning has been performed, it is still imperative to start the preservation process soonest. Preservation can be in the form of coatings, film wrapping, fogging etc.

Talk to our expert and we can explain to you more.

Co-dependent factors of a cleaning process

Achieve the best preservation results and save on operational costs

Our rust preventive and asset preservation solutions are formulated for the tough marine/outdoor environment, maximizing durability and readiness for the next job. The best part? They are easy to use, and they come with handy user guides, so your crew can work independently; you no longer need to outsource to expensive third party for rust removal, surface cleaning and preservation works.

Idealfuids continuously develops and improves on a wide range of high quality Ox-Pro™ products. Achieve the best cleaning or preservation results with us today.

Ox-Pro™ Range of Products

Product – consumables	Description	Packaging
Ox-Pro 360 VCI Emitters (10g/ea)	The VCI emitter can emit VCI content to fill up void spaces up to 5 cubic ft.	200 pieces/ carton
Ox-Pro VCI Desiccants (20g or 50g / ea)	The VCI desiccants works in duo mode. It can be used as a desiccant and also as a VCI. Both work in synergy.	120 pieces/ bag
Product – coatings	Description	Packaging
Ox-Pro 160 Waxy coating	The solvent-based product provide a long-lasting effect for outdoor oxidation protection. Its fast-drying rate and waxy coating make it ideal for parts kept in outdoor storage conditions.	5L, 20L, 200L
Ox-Pro 160 D series Waxy coating	The solvent based product works similarly as Ox-Pro 160. The product is a cost-effective product for shorter term oxidation production. It also has the characteristic of fast drying and waxy coating. Good for parts kept under outdoor storage conditions.	5L, 20L, 200L

Ox-Pro S32 Oily coating	The VCI oil-based coating can be used for internal or external application. Its multifunctional antirust lubricant can be used for antirust, lubrication, dehumidification, rust loosening, cleaning and insulation.	5L, 20L, 200L
Ox-Pro S33 Water based coating	The VCI water-based rust proof coating provides an extremely thin transparent film on the metal parts. Good for parts that require easy removal and temporary indoor storage.	5L, 20L, 200L
Product – For piping, Tanks and Vessels	Description	Packaging
Ox-Pro 137 Ferrous (Powder)	Ox-Pro 137 VCI powder is soluble in water which makes it ideal for spraying powder or mixing with water for oxidation protection. It forms a molecular protective layer on ferrous metal surfaces.	5kg, 20kg
Ox-Pro 331 Multi-metal (Powder)	Ox-Pro 331 VCI powder is insoluble in water. Its multi-metal oxidation protection property makes it ideal for situation that prevent gum formation after application of the product.	5kg, 20kg
Ox-Pro 331 S Multi-metal (Powder)	The S version of the Ox-Pro 331 makes this product water-soluble yet multi-metal oxidation protection.	5kg, 20kg
Product – Cleaning and Degreasing	Description	Packaging
Ox-Pro 414 Aquaclean Heavy duty alkaline cleaner	Ox-Pro 414 Aquaclean is a cleaner and degreaser that can also use to remove temporary coatings. Its high foaming characteristic enables vertical surface cleaning. Good for oven cleaner, coal remover.	500mL, 2L, 5L, 20L, 25L, 200L
Ox-Pro 426 Rust and stain & cement remover	An acid based cleaner and metal brightener that is used to remove light rust, rust stains, and inhibits corrosion. Ox-Pro 426 will leave a light passivation layer on metal surfaces.	500mL, 2L, 5L, 20L, 25L, 200L
Ox-Pro 888 Solvent cleaner	High flash point, non-DG solvent cleaner which can be used for removal of heavy mineral oils and waxes.	5L, 20L
Product – Packaging	Description	Packaging
Ox-Pro VCI film (Indoor)	 Ox-Pro VCI Films are made to order, customizable. We offer competitive pricing and service. Please reach out to us at sales@idealfuids.com with the following information: • Parts storage conditions • Size of bags required (Length x Width x Thickness)	Thickness – 50-200 microns.
Ox-Pro VCI UV film (Outdoor)		
Ox-Pro UV Shrink film (Outdoor, non-VCI, WHITE/ opaque)		
Ox-Pro VCI Shrink film (Indoor)		
Ox-Pro VCI UV Shrink film (Outdoor)		
Ox-Pro VCI sealable bags (Indoor)

	- Size of parts (Might require adds on such as VCI emitters, VCI desiccants or fogging prior to wrapping) - Do you require on-site service?	
Accessories: Ox-Pro Heat Shrink Tape 3.75" x 180' (roll)	 Shrink wrap tape, used together with PE shrink film. Robust, durable and high impact 2 mils adhesion tape.	12 rolls/ carton or sold separately
Ox-Pro VCI paper (Plain Kraft Paper - 57g/m2)		Customizable
Ox-Pro VCI paper (Plain Kraft Paper - 67 g/m2)	Ox-Pro VCI paper are made to order, customizable. We offer competitive pricing and service. Please reach out to us at sales@idealfuids.com with the following information: - Parts storage conditions - Size of packaging (Length x Width x Thickness) - Size of parts or current packaging size - Do you require on-site service?	Customizable
Ox-Pro VCI paper (Plain Kraft Paper - 82 g/m2)		Customizable
Ox-Pro VCI Aluminum barrier - 195g/sqm		Made to order; Customizable
	 Made-to-order, Customizable	
Product – Preservation tools & Services	Description	
Heat Shrink Gun	To use with Ox-Pro VCI shrink film. (Electric or Gas)	1 piece
Fogging Machine – Powder type	To use with Ox-Pro 137 or 331 or 331 S	1 piece
Fogging Machine – Liquid type	To use with Ox-Pro 137 or 331 S after mixing with water	1 piece
Corrosion testing & R&D	We provide Corrosion coupons analysis and corrosion report. We can also partner with clients to develop new products or OEM.	10 pieces per set
Preservation engineer	Can be supplied as a consultant to provide Preservation	Day rate; weekly rate

Contact our customer service for prices and availability.
